Fenders (6)

Boat hook

Recent Service/Upgrades

Bottom epoxy barrier coating (2018)

Bottom paint (2018)

Major outdrive service (2017)

Swim platforms rebuilt (2018)

Broker's Comments:

Superb ride handling, design and quality of finish. The 24 Limestone Express is built for rugged use in challenging conditions and is both fast and very seaworthy. Designed by Mark Ellis and built to commercial standards by Hinterhoeller Yachts, Limestones are often the boat of choice for safety, law enforcement and patrol agencies. The express layout features a large self-bailing cockpit with raised helm and removable aft seats and a full canvas enclosure. Both galley and the head have standing headroom and the dinette converts to a 6'6" V-berth.

This freshwater 24 Express has seen over \$12,000 in upgrades since 2017, including installation of 30-Amp shore power service, increased battery capacity, brand new fridge and head, major outdrive service, and an epoxy barrier coat and new bottom paint. If safety, seaworthiness and performance are high on your list, this is one of the best boats you can buy!
