Generator overhaul (2018)
All existing safety and mooring equipment
Dock box
2016 survey

Broker's Comments:

Produced from 1982 - 1990, the 40 Aft Cabin was a big seller for Silverton. With a solid fiberglass hull, she has easily outlasted many of the cored hull designs that followed, and her wide 14' beam adds great stability when the going gets rough. The interior layout is roomy with wrap-around windows for great natural lighting and visibility and rich teak cabinetry throughout. Both heads have separate shower stalls, and the stepped-down galley is well equipped with full-size fridge, stove and oven. This Great Lakes freshwater boat has been very well maintained - a "must see" for anyone after a reliable aft cabin with all the cruising comforts at a very affordable price point.
