New trailer tires (2020)

Brokers Comments:

What can we say? How many recreational boats meet international certification requirements (CE-B) for off-shore use in conditions up to Force 8 winds and 13 foot seas? Boston Whaler's 220 Dauntless meets those stringent design and performance requirements. A hull and deck built with high quality resins, woven glass matting and an injected closed cell foam core form a solid, inseparable unit capable of delivering years of rugged use. If you are looking for time-tested performance and safety in well designed a centre console, it simply doesn't get much better.

This two-owner 220 Duantless has everything needed for serious fishing, a safe and comfortable family cruise or a day of swimming, diving or water skiing. She comes fully equipped with a canvas T-Top, bow-mounted trolling motor, live well, portable head, and an oil injected 225 HP 2-stroke engine designed for use in fresh or salt water. The package includes a tandem trailer with new tires and chrome rims.
