New foam mattresses in aft cabin in 2016

Excluding: Dinghy and motor, stainless anchor

In production from 1983-90, the Carver 3207 Aft cabin offered more comfort and livability than other boats in its class. The 1983 version has two private staterooms: a master stateroom aft with both a single and pull-out double berth, and a forward stateroom with V-berth. A convertible sofa in the salon pushes total sleeping capacity to six - enough to easily accommodate a small family. The forward head has a separate shower stall and the aft stateroom has a private head with vanity.

"Dream Out Loud" has been diligently maintained and upgraded over the years. The bilges and engine compartments are spotless, interior upholstery has been upgraded and current electronics added. The twin 270HP Crusader engines provide proven reliable power and are regarded by many as best-of-breed when it comes to marine gas engines. Read this informative [David Pascoe article](#) and you will see why.

This mid-size family cruiser is exceptionally clean and a must see if you are searching for two-stateroom convenience at an extremely affordable price.
