All existing safety and mooring equipment

All existing manuals

Recent survey (2021)

Hard-bottom dingy and two-stroke motor included

Brokers Comments:

Carver's 3607 entered production in 1982 with a hybrid hull providing economical performance at displacement speeds that can easily get up on plane when the throttles are applied. A center queen bed in the aft cabin, huge U-Shaped dinette and aft deck hard top with wing doors are just a few of the attractive features on this very clean 36-foot aft cabin cruiser. The lower helm position is a bonus when the weather socks in, and it leaves plenty of room in the salon for a comfortable sofa, two chairs and a coffee table. With two staterooms and separate heads, two couples or a family can cruise in comfort and privacy. In short, this is a time-tested layout with lots of storage for extended cruising or even full-time live-aboard. Topping it off, she's powered by Crusader big block engines (240 hours since rebuild) regarded by many as among the finest marine engines on the market for performance and reliability.
