JVC AM/FM/CD stereo system (salon)

Clarion stereo system (bridge) with aft deck remote

- Audison SPX2 two channel amplifiers (2)

- Bazooka marine speakers and subwoofer

All existing safety and mooring equipment

Broker's Comments:

Produced from 1995-1998, Mainship's 37 Motor Yacht was considered an innovative design with some unique features not found in traditional aft cabin cruisers. Omitting a forward cabin windshield allowed the galley and dinettes to be fully integrated with the salon, providing a truly cavernous cabin space with loads of headroom. Topside, the same feature allows for what many consider to be the safest and most convenient foredeck access available - a wide walkway directly from the bridge to the forward deck area means no need to traverse narrow side decks from stern to bow.

With two staterooms and two heads, the 37 Motor Yacht offers a full suite of cruising amenities for a small family or two couples. For day excursions, the bridge comfortably seats eight with room for a few more on the hardtop aft deck, and a molded staircase with railing leads down to an extended swim platform for water level activities.

This 100% freshwater cruiser with minimal engine hours is very well equipped and shows exceptionally well. From the sparkling clean bilges to the spotless decks, this is one of the cleanest offerings we've seen for some time. Be sure to give her a serious look if you are considering a mid-size aft cabin with contemporary open concept interior with all the essential cruising amenities -and then some.
