Hot water tank

Transom hand shower

SeaStar hydraulic steering

Hydraulic trim tabs

Rail-mounted fender racks (3)

Automatic halon fire suppression (engine compartment)

CO2 detectors

Remote oil changer system (main engines)

Comments

Silverton's 41 aft cabin features an impressively large interior with a large salon and two staterooms, both of which have walk-around double berths. Throw in the full-beam aft deck and you have a very comfortable cruiser that can easily double as a spacious live-aboard. Either way, you will be amazed at the amount of livable space and storage Silverton has packed into 41 feet.

This 100 percent freshwater Silverton Aft Cabin rides on a solid fiberglass bottom. Cruising speed is 22 mph with a 33 mph top-end. The modified-V hull maintains a plane down to 18 mph, and she can cruise all day at displacement speeds with minimal fuel burn. The hardtop aft deck, radar arch and molded pulpit were standard features on this model. It's very rare to find a mid-nineties boat with such low hours on both the main engines and the generator. Come for a look. We think you'll be very impressed, if not totally blown-away, at what this boat has to offer.
